

DUAL USE

TECHNOLOGY BRIEFING

Small Businesses To Compete For Over \$20 Million In Army Contracts

Warren, MI - The United States Army Tank Automotive Research, Development and Engineering Center (TARDEC) will be awarding over \$20 million this year in contracts to U.S. small businesses selected to work on a series of collaborative technology development projects that have dual use applications for the military and industry.

These awards will be made through the Small Business Innovation Research (SBIR) Program, managed by the National Automotive Center (NAC), the technology transfer group within TARDEC. The program will be outlined to all interested parties in a briefing scheduled in June.

Briefings concerning Cooperative Research and Development Agreements (CRADA) and Government Contracting will also be included.

The half-day session will be held:

5 June at Automation Alley, Troy, 9:30-11:30 AM

To register, visit:
